

REMOTE WATER SHUT-OFF (North America)

The basic kit is as simple as using a light switch and because it is wireless can be mounted anywhere inside the home. This switch can be mounted near your door so that when you leave all you do is press the switch "down" like turning off a light and the main water valve will close. This switch can be addressed to the valve to be able to control so that you never leave your home wondering if you turned the water off or not.

For outside applications where your gardener, pool caretaker or maintenance crew may need access to water while you are away, we offer a slave switch installed inside a waterproof enclosure, ensuring the switch is protected from inclement weather that can be mounted outside your home. The valve will automatically close after 2 hours when opened by the external switch.

Technology:

Merging of EnOcean Wireless Technology and Spartan workmanship in the Valve control industry allowed this new product to be developed.

The power is generated by the kinetic action of your finger therefore the switch uses no batteries and does not require power.

Embedded in this solution the EnOcean protocol permits an interference free and unique addressing installation. Based on the open frequency of 315MHz.

Functionality:

Basic Kit:

3/4" kit WS-K-315-34 valve should be installed on your main supply line. The master switch can be located typically within a range of 100 feet within the building.

Slave switch:

Two types are available. For interior use you can add a WS-S-315. This unit should be installed within 100 feet from the valve. For external use the weatherproof switch WS-WP-315. This unit should be installed within 50 feet of the valve.

ACTUATOR:

FCC ID:SZV-TCM-320C IC:5713A-TCM-320C

SWITCH:

FCC ID:SZV-PTM-200C IC:5713A-PTM-200C

The Spartan Remote Water Shut-Off assembly is a simple and unique way to securely turn off the water when you are away for any period of time. It also has an optional exterior switch for temporary opening of the valve for outdoor applications.

WS-K-315-34	3/4" Kits contains the following 4 items
WS-A-315	Wireless Actuator 315mhz
WS-243-34	Valve body 3/4 threaded F-F NPT
WS-S-315	Wireless Switch 315Mhz
WS-P-24-10	110Vac - 24Vac Power Supply
WS-S-315	Wireless Switch 315Mhz
WS-WP-315	Wireless Switch 315Mhz with weather enclosure
